Project Manager Badge

The **Registered Project Manager** badge is required on all program-related marketing materials as proof that you have been vetted by our enrollment process. Using this badge helps instill confidence in your solar project. Please follow these rules for usage:

1. Keep each badge at a size no smaller than 1.5" wide.

2. Use each badge design as provided. Do NOT distort the badge, change its color, change its font, or otherwise alter the badge's lockup.

3. Separate the badge from your organization's logo with a thin gray line slightly longer than the length or width of your logo (see examples, right).

4. The badge may be situated either next to or below your logo; in either case, maintain adequate padding between logos and follow the clear space guidelines specified within the Oregon Solar Community Program style guide and your own organization's brand guidelines.

5. Do not use the badge in such a way that implies sponsorship of a product, belief, or organization.

6. Do not use the badge if you are NOT registered with the program. Doing so is a breach of conduct and may result in suspension or ban.
