

## A new way to go solar: Subscribe to a local community solar project

You don't need to own a house, have a sunny roof or invest in an installation to go solar. Simply subscribe to a community solar project through the Oregon Community Solar Program.

Get solar credits on your bill, offsetting your electricity use. Most customers save money on annual electricity costs.

Help the planet—reduce your carbon footprint.

Support local solar development and local clean energy jobs.

Get discounted rates and additional benefits if you meet low-income guidelines.

**OREGON  
COMMUNITY SOLAR  
PROGRAM**

**Solar for everyone.  
No sunny roof needed.**

The Oregon Community Solar Program is a state-enabled initiative  
overseen by the Oregon Public Utility Commission.

## More Oregonians can now go solar

The Oregon Community Solar Program expands access to solar energy. Oregon residents, businesses, nonprofits and government entities can all sign up. It doesn't matter whether you rent or own your home or building, and it doesn't matter what kind of home you live in. If you have a utility account with Portland General Electric, Pacific Power or Idaho Power, you are eligible to subscribe to a community solar project.

### Discounts for people with low incomes

One of the goals of the Oregon Community Solar Program is to expand solar access for people with low incomes. If you meet income guidelines, you could qualify for discounted rates, no up-front costs and other benefits and protections when you subscribe to a community solar project.

## See the benefit on your utility bill

- You will receive a credit for your portion of the solar energy generated at your project and pay a subscription fee on your monthly utility bill.
- Most subscribers will also save on their bill thanks to the solar generation. In other words, the credit covers the subscription fee and can save on annual electricity costs.
- If you meet low-income guidelines, you will receive special benefits and protections including no upfront costs, no termination fees, subscription discounts and guaranteed savings on your energy bill.
- The monthly charge and solar savings amounts vary by project, subscription type, subscription size and your electricity usage.

## Learn more and sign up online

Scan the QR code with your phone, or go online to [www.oregoncsp.org](http://www.oregoncsp.org) to learn more and sign up with a subscription manager for community solar projects serving your area. They can answer your questions and guide you through the enrollment process.

Income-qualified customers can receive assistance in being matched to a project from the program's low-income facilitator.

All participating community solar projects are registered with the Oregon Community Solar Program and are required to follow program requirements and code of conduct.

## How does community solar work?

1

You sign up as a subscriber to a local solar project.

2

The solar project generates clean, renewable energy for the utility grid.

3

You receive a bill credit for your portion of the solar energy generated and pay a subscription fee on your monthly utility bill. The credit covers the subscription fee and can save money on annual electricity costs.

Subscribe to a community solar project today!
